

STATISTICS SEMINAR

Dr. Brian Arnall, Professor, Department of Plant & Soil Sciences, OSU

APPLIED AGRONOMY, WE NEED STATISTICAL HELP

Friday, October 24, 2025

2:30 – 3:30 pm

310 MSCS

Abstract: This seminar will cover two aspects of Applied Agronomy and Statistics. First traditional applied agronomic research deals with many restrictions that create statistical challenges. Second the new generation of field research is moving from traditional RCB and RCBD small plot work and diving into soil and plant factors that driving crop and biological response across landscapes and environments. Both of these drive the need for Agronomic and Statistical specialist to be collaborative and maintain open communication.

Refreshments immediately following seminar in Room 309 MSCS.
